## **Guardian Mobility receives STC for Eurocopter 350s**

### **Guardian 3 tracking devices have been granted FAA certification**

*Ottawa, ON, Canada, February 18, 2010* – Guardian Mobility announced today that its Guardian 3 tracking devices have been granted Supplemental Type Certificate (STC) approval by the FAA for installation in Eurocopter AS350 and AS355 model aircraft.

Guardian GPS tracking devices are used in thousands of aircraft worldwide to report on their status and location in real-time. This latest FAA regulatory approval complements the Transport Canada certification granted last year on the same models of helicopters, and allows for more customers in the United States to take advantage Guardian 3 products.

#### **About Guardian Mobility Products**

Guardian Mobility offers aircraft communication and tracking products and services. The Guardian 7 product line is a modular system featuring a two-way text messaging unit with the ability to automatically route data from on-board partner applications. The Guardian 3 product family includes satellite GPS devices for both the Globalstar and Iridium satellite networks to suit aircraft operators' needs. All Guardian Mobility products offer a variety of antenna and device configurations for portable and mounted installations. Flexible airtime packages are designed with the needs of aircraft operators in mind and added services include advanced web-based mapping and customizable alerts.

#### **About Guardian Mobility**

Guardian Mobility offers a full range of GPS tracking and satellite communications solutions for aircraft, devices that run on the Iridium and Globalstar satellite networks. In 2004, Guardian introduced the first portable GPS tracking device for aircraft, which helped fleet operators know the status and location of their aircraft at any given moment. In 2009, Guardian introduced an aircraft communication device with two way text messaging and data relaying capabilities which helps operators increase efficiencies and reduce costs. Guardian's products are approved for Automatic Flight Following (AFF) and used by forestry contractors worldwide.
