Guardian Mobility appoints Ken Stewart as Director of Customer Support Services

New sales organization to attend NBAA 2010 in Atlanta, GA Booth #5917

Ottawa, ON, Canada, October 15, 2010 – Guardian Mobility announced today that Ken Stewart has been appointed to the role of Director of Customer Support Services. As a result of this change, Guardian has restructured its sales organization to include some familiar faces from the industry. Come see Ken along with some of Guardian's new sales team at NBAA 2010, Booth # 5917.

"I am very excited about this opportunity to bring a new level of excellence to Guardian's customer service. Over the past five years, Ken has established an outstanding track record of satisfaction and loyalty among his customers, so it seems only natural to trust him with the future of the Guardian's customer service." said Jean Carr, President and CEO of Guardian Mobility.

Ken will be instrumental in working closely with Guardian's sales organization on an ongoing basis to ensure that Guardian is providing outstanding customer service consistently. Ken is familiar with the challenges faced by customers and the sales organization alike from his previous role as Territory Manager, making him the ideal candidate to fill this role.

Guardian has had a great year of overcoming challenges and innovating new solutions for the aviation industry. Come by Booth #5917 at NBAA, October 19-21 in Atlanta, to see Guardian's latest developments.

About Guardian Mobility

Guardian Mobility is a world leader in providing end-to-end satellite communications and GPS flight following solutions for aircraft, with pricing specifically geared to the needs of aircraft operators. Guardian has developed a full range of products aimed at helping aircraft operators increase efficiencies, reduce costs and improve reporting. Guardian introduced the first portable GPS flight following device in 2004, delivering location and status information to aircraft operators, and has since developed a device to facilitate 2-way text messaging and automatic data communications between the aircraft and the ground. Guardian's products are approved for Automatic Flight Following (AFF) and are used by fleet operators worldwide.
