

## Guardian Mobility appointed Value-Added Reseller by Iridium

### New status brings added value and flexibility for Guardian customers

NBAA, Las Vegas, NV, October 9, 2011 – Guardian Mobility today announced that it has been awarded VAR (Value-Added Reseller) status by Iridium Communications Inc. This allows Guardian greater flexibility to package communications services into bundles custom-tailored to fit the needs of its operators. This provides greater efficiencies resulting in lower costs and a greater level of service.

Guardian bases its services on the Iridium satellite network to provide reliable and truly global communications. This allows Guardian to provide real-time services to its customers, wherever their aircraft fly. These services include Automated Flight Following (AFF) and Flight Data Monitoring (FDM) with full analytics. This provides in-flight alerts to exceedances and FOQA events with full analysis available immediately after landing.

#### **About Guardian Mobility**

Guardian Mobility is the provider of global tracking, voice and data communications and data management solutions to the aviation marketplace. Guardian has developed a full range of products and services targeted at assisting aircraft operators increase safety and efficiency, reduce costs and improve reporting. Guardian introduced the first portable GPS tracking device in 2002, delivering location and status information, and has since developed solutions to facilitate 2-way text messaging and automatic data communications between the aircraft and the ground. Guardian's products are approved for government-mandated Automatic Flight Following (AFF) and are used by fleet operators worldwide for Flight Data Monitoring (FDM) and Engine Trend Monitoring (ETM) to support Flight Operations Quality Assurance (FOQA) and Maintenance Operations Quality Assurance (MOQA) as part of a Safety Management System (SMS).
