

GL320MG

Small handheld tracking device for aircrew safety and crew management.

The GL300MG provides global, real-time tracking and safety features to ensure duty of care to your personnel when operating in difficult locations. It is a small water-resistant GSM (quad-band) GPS tracker designed to operate over long timelines and can send emergency, motion detection, GEO fence and ignition alerts. GEO information is all viewed on the Guardian web-based platform in real-time and can be sent via email or SMS to anyone configured.
