

# AXIS

COMMAND  
AND CONTROL

## AXIS platform brings all your assets live on one screen

A powerful, web-based application that offers a new approach to tracking your aircraft fleet wherever you are in the world.

### DESCRIPTION

More than just tracking your fleet wherever in the world your mission takes you, the AXIS platform ensures flexibility, reliability, and accuracy in managing your assets. Government-certified for Automated Flight Following (AFF) and Automated Telemetry Units (ATU aerial firefighting capability), this G4 and device agnostic systems becomes the hub for aircraft tracking, connecting aircraft, flight ops and administrative resources in one unified resource.

## FEATURES

- ✓ **Aircraft Status at a Glance**  
Dashboard view enables a quick overview of your whole fleets location, altitude, landed/in-flight status, alerts, and more.
- ✓ **Google Maps and Standard Overlays**  
Familiar Google mapping with satellite, hybrid, terrain, and quick location searching. Flight Charts, TFR, METAR, TAF, and others.
- ✓ **Reports**  
Generate custom reports and export to other analytic systems.
- ✓ **Points of Interest**  
Pre-configured with airports and user defined.
- ✓ **Mobile**  
Optimized to work on any smart-phone or tablet.
- ✓ **Alerting/Notification**  
Customized alerts that can be shared with other AXIS users—notifications can be sent via email or text.
- ✓ **Permissions and Roles**  
Ensure the right people have access and can make changes with highly integrated permission and user roles.
- ✓ **Flight Data Monitoring (FDM)**  
GMI FDM light capability with live caution and warnings and full FDM capability potential through the IRIS product suite.
- ✓ **Live Link**  
Ability to provide links to specific aircraft without an account.
- ✓ **Two-way Messaging**  
Intuitively communicate with Air, Sea, and Land Assets using two-way text messaging.
- ✓ **ATU**  
Receive and display ATU data for aerial firefighting operations.
- ✓ **Push-to-talk (PTT) Voice**  
Communicate more effectively with compatible assets through PTT voice.
