

SilverEyeAviation

Aircraft Business
Intelligence

SilverEye Aviation brings all your assets live on one screen

A powerful, web-based application that offers a new approach to tracking your aircraft fleet wherever you are in the world.

DESCRIPTION

More than just tracking your fleet wherever in the world your mission takes you, the SilverEye Aviation platform ensures flexibility, reliability, and accuracy in managing your assets. Government-certified for Automated Flight Following (AFF) and Automated Telemetry Units (ATU aerial firefighting capability), this G4 systems becomes the hub for aircraft tracking, connecting aircraft, flight ops and administrative resources in one unified resource.

FEATURES

- ✓ **Aircraft Status at a Glance**
Location, altitude, landed/in-flight status and more.
- ✓ **Standard Overlays**
Flight Charts, TFR, METAR, TAF, and others.
- ✓ **Reports**
Generate custom reports and export to other analytic systems.
